re: AMPTP Agreement Libraries

Enclosed, per your request, is a complete cd of the AMPTP libraries. It might be helpful for you to call me before installing so I can explain the nuances or a network installation.

The cd contains the complete current windows library release plus the viewer software.

Please let me know how many users are installed. There is no limit or license issues. I simply have to pay a royalty for the viewer we use based on number of users. There is no cost to Sony as the use is part of AMPTP membership.

I will be happy to come over and do training, another service of the AMPTP, should you have the need. You can reach me at the AMPTP on 818.935.5910 or mark@tw.amptp.org.

The following are some notes:

Network Installation

DO NOT copy the cd to the network. Use the "Network Install" from the cd. Then install each workstation from the network (run setup.exe from the network). This will allow the library to reside on the network and viewer on the workstation.

Original DOS Library

The original DOS library (1988 to 1992 agreements) are contained in a folder, \20library, on the cd. The entire folder may be copied to the network. Files should be read-write. The library can be accessed by putting a short-cut on your desktop to the file views.exe

Let me know how I can help expedite the installations or if there is anything else you might need.

Regards,

Mark A. Fien, CPA
